WEEKLY HOME STUDY PACKAGE - WEEK 1 (05/07/21 – 09/07/21)

Subject	AGRICULTURAL SCIENCE	Year/Level	9
Strand	AS 9.2 Farm Management		
Sub-strand	AS 9.2.2 Financial capital		
Content Learning Outcome	Explore the importance of farm management.		

Lesson outcome: At the end of this lesson the student will explain why farming is considered a business.

SOLUTION

1. Define the term farming.
Farming is defined as the business of growing crops and raising animals.
2. Differentiate between input and output.
Input are things used in an enterprise to produce a good or service whereas output is the amount of something produced by a person, machine or process.
3. Discuss why farming is treated as a business.
Farming is treated as a business because farming enterprises process inputs, called resources, to produce outputs called agricultural products and by-products.
4. Give a reason why farming business should be well managed.
Farming business should be well managed to be profitable.
5. Explain why it is important to study the soil type before planting any crops.
They type of determine what plants to be grown in an area. For example if the soil is wet, rice can be planted and the soil is alluvial vegetables, root crops and other assorted crops can be planted
6. Explain why machines are used in farms
This makes our work easier and faster. It also saves time and money.
7. Define Topography
It is the slope of land. It can be flat land, sloppy land or hilly land
